

To Whom It May Concern:

Rod Dietrich, CEO of Professional Office MD, and Barry Bodiford, CEO of 360clean, have been exceptional additions to our Vendor Program and the 800 physician members of our IPA here in Charleston, South Carolina.

Professional Facility Care has provided us with unique services that are designed for healthcare practices, which was very much missing in this community. We have experienced to date that most of our practices have not only called to thank us for finding Professional Facility Care's services, but have recommended them to their constituency.

Rod has also been a great advocate in growing and promoting our vendor program. He is a great advocate of learning about the IPA with which he partners and helping to promote our values and services.

We are also very pleased with the revenue share program Professional Facility Care has offered to the IPA.

In closing, I can highly recommend Professional Facility Care with respect to their services, quality, integrity and specialization in healthcare facilities.

Sincerely,

Beth Crowder
Executive Director
United Physicians Inc
